COUNCIL OF EUROPE EUROPEAN LANDSCAPE CONVENTION

TENTH COUNCIL OF EUROPE MEETING OF THE WORKSHOPS FOR THE IMPLEMENTATION OF THE EUROPEAN LANDSCAPE CONVENTION

'Multifunctional Landscapes'

- DRAFT PROGRAMME -

30 August 2011

Largo das Portas de Moura | Évora

Evora, Portugal, 20-21 October 2011

Study visit, 22 October 2011

*Document prepared by the Cultural Heritage, Landscape and Spatial Planning
Division of the Council of Europe*

The 10th Council of Europe Meeting of the Workshops for the implementation of the European Landscape Convention is organised by the Council of Europe – Cultural Heritage, Landscape and Spatial Planning Division, Directorate of Culture and Cultural and Natural Heritage – in cooperation with the Government of Portugal – Directorate General for Spatial Planning and Urban Development of the Ministry of Agriculture, Sea, Environment and Spatial Planning.

Introduction

International intergovernmental organisation created in 1949 and whose headquarters are in Strasbourg (France), the Council of Europe has 47 Member States. Its main objectives are to promote democracy, human rights and the rule of law and to seek common solutions to the main problems facing European society today. The Organisation is active in promoting sustainable development in line with the Recommendation Rec (2002) 1 of the Committee of Ministers of the Council of Europe to Member States on the Guiding Principles for sustainable spatial development of the European continent. These seek to protect populations' quality of life respecting and valorising the resources of the territories.

The European Landscape Convention was thus adopted by the Committee of Ministers of the Council of Europe on 19 July 2000 in Strasbourg and opened for signature of the Member States of the Organisation in Florence (Italy) on 20 October 2000 with the aims to promote European landscape protection, management and planning and to organise European co-operation. It is the first international treaty to be exclusively devoted to all aspects of European landscape. The Convention applies to the entire territory of the Parties and covers natural, rural, urban and peri-urban areas. It concerns landscapes that might be considered outstanding as well as everyday or degraded landscapes.

To date, 34 Council of Europe member States have ratified the Convention: Armenia, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Finland, France, Georgia, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Moldova, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, “the former Yugoslav Republic of Macedonia”, Turkey, Ukraine and the United Kingdom. Five states have signed but not ratified it: Andorra, Azerbaijan, Bosnia and Herzegovina, Malta and Switzerland.

Organised by the Council of Europe on a regular basis since 2002, the Meetings of the Workshops for the implementation of the European Landscape Convention take a detailed look at the implementation of the Convention. Special emphasis is given to the experiences of the state hosting the meeting. A genuine forum for sharing practice and ideas, the Meetings are also an opportunity to present new concepts and achievements in connection with the Convention. The proceedings are published in the Council of Europe's “*European Spatial Planning and Landscape*” series and are available on the Council of Europe's European Landscape Convention website. The following Meetings of the Council of Europe Workshops for the implementation of the European Landscape Convention have been held so far:

- 23-24 May 2002, Strasbourg: “*Landscape policies: contribution to the well-being of European citizens and to sustainable development (social, economic, cultural and ecological approaches); Landscape identification, evaluation and quality objectives, using cultural and natural resources; Awareness-raising, training and education; Innovative tools for the protection, management and planning of landscape*”;
- 27-28 November 2003, Strasbourg: “*Integration of landscapes in international policies and programmes and transfrontier landscapes; Landscapes and individual and social well-being; Spatial planning and landscape*”;
- 16-17 June 2005, Cork (Ireland): “*Landscapes for urban, suburban and peri-urban areas*”;
- 11-12 May 2006, Ljubljana (Slovenia): “*Landscape and society*”;
- 28-29 September 2006, Gerona (Spain): “*Landscape quality objectives: from theory to practice*”;
- 20-21 September 2007, Sibiu (Romania): “*Landscape and rural heritage*”;
- 24-25 April 2008, Piestany (Slovakia) “*Landscape in planning policies and governance: towards integrated spatial management*”;
- 8-9 October 2009, Malmö (Sweden), “*Landscape and driving forces*”;

– 15-16 April 2011, Cordoba (Spain), “*Landscape and infrastructures for the society*”.

Organisers

The Council of Europe wishes to thank for their cooperation the Government of Portugal – Directorate General for Spatial Planning and Urban Development of the Ministry of Agriculture, Sea, Environment and Spatial Planning, the city of Evora.

The Council of Europe also thanks the Swiss Federal Office of the Environment, Forestry and Landscape for its support.

The aim of the Meeting of the Workshops

The European Landscape Convention states that the advances in production techniques in agriculture, forestry, industry and mining, together with the practices followed in town and country planning, transport, networks, tourism and recreation, and more generally the global economic changes, have in many cases led to degradation, debasement or transformation of landscapes.

The landscape is however, as the Convention mentions, an essential factor for the quality of life of people. It has an important public interest role in the cultural, ecological, environmental and social fields, and constitutes a resource favourable to economic activity, particularly to tourism.

Each citizen should contribute to preserving the quality of the landscape and it is the responsibility of the public authorities to define the general framework in which this quality can be secured. It appears essential in this context to take into account the “multifunctional value” of the landscapes.
