

# summer course Introduction to Econometric Production Analysis with R

3-7th september 2012, 9h00-17h00

## Target audience

Graduate, MSc students, PhD students and other professionals interested in gaining knowledge on econometric data analysis using the R software.

## Inscription

Maximum 25 participants  
Deadline: 21st July 2012  
Fees: Students, €400,00;  
Others €500,00  
(includes accommodation, meals and certificate)

## Venue

Agriculture School of Bragança  
Room G2-S0/02

## Objective

The participants of this course will learn to analyse production technologies and producer behaviour by applying microeconomic production theory and econometric methods.

Participants will obtain relevant qualifications in econometric production analysis so that they can contribute to the knowledge about production technologies and producer behaviour.
